www.lumsa.it

Founded in 1939, LUMSA is the second oldest university in Rome and it is located in the heart of the city. Inspired by Catholic values, LUMSA is a public non-state university, committed to the education of young people and professionals. It offers **academic excellence** tailored to the needs of the individual student.

At LUMSA, we seek not only to prepare students for success in their careers, but also to **inspire, support** and **help** them become who they are.

There are **1.600 graduate and undergraduate enrolments every year**, with a total student population of 7.200 from all over Italy and 53 other countries. Last year, LUMSA awarded over 1.500 degrees and granted **financial aid** in our commitment to providing access to higher education for students from any economic background.

LUMSA is a member of Euraxess, FUCE - IFCU and EUA networks.

MSc in Management and Finance

Overview

The MSc in Management and Finance (MMF) aims to train graduates with specific and qualified skills in management and finance required to operate as manager and consultant for companies, financial institutions and public administrations. It offers an international learning path in which functional and sectoral knowledge are integrated into the themes of innovation and sustainability, preparing graduates to take on managerial roles with full awareness of the economic, social and environmental challenges of the 21st century. The 24-month program proposes two majors taught in English:

- Entrepreneurship and Innovation for Sustainability
- Banking and Finance for Innovation

The program proposes also a major in Administration, Financial Management and Control, taught in Italian, for students fluent in Italian. Further information can be obtained at: www.lumsa.it

Major in Entrepreneurship and Innovation for Sustainability

This major aims at preparing the leaders of the future who are innovative and capable of creating breakthrough strategies and sustainable business models. Students will acquire entrepreneurial skills and become familiar with advancements in the theory and practice of innovation and sustainability.

Key learning objectives:

- learn key corporate functions and processes
- acquire innovation skills necessary to generate original and innovative solutions for a sustainable society.
- develop skills to evaluate and formulate sustainability strategies

Career prospects

The program provides an excellent preparation for management careers at companies of different sizes, operating in various sectors at local or global levels. The program provides an excellent preparation for jobs in new business development and start-ups, sustainability and innovation consultancy.

Major in Banking and Finance for Innovation

The major prepares graduates for a wide range of careers in the financial services sector. It is an innovative finance program covering a broad range of topics. It provides students with an understanding of both the financial basics and the impact of digital transformation in banking and financial services (e.g. fintech).

Key learning objectives:

- explore advanced finance topics
- discover financial and investment decisions in firms
- investigate the impact of innovation and sustainability issues in banking

Career prospects

The program presents many career opportunities as managers and analysts in the banking, insurance, financial services and financial consultancy sectors as well as in authorities and regulatory agencies. It provides also an excellent preparation to become financial analysts, CFOs, investment bankers and corporate finance advisors.

Program Structure

The MSc in Management and Finance is a 120 ECTS program with a duration of 24 months.

The learning path is structured in courses, internship, thesis and other learning activities. After a common first semester, students will have a specific study plan for each major. Students will learn the impact of digital transformation on business and society with a compulsory lab of 30 hours in the first semester of the second year.
